ATTENTION! MEDICAL ALERT!

Allergic Reaction to Nuts, Peanuts, Sesame Seeds and Peanut Products

Please be informed that this year we have children at Robert Rundle who are ANAPHYLACTIC TO NUTS, PEANUTS, SESAME SEEDS AND ANY PEANUT PRODUCTS. An ANAPHYLACTIC reaction is an allergic reaction so severe it can cause death within minutes of eating or touching nuts, peanuts, sesame seeds or any other peanut products. We would request NO nuts, peanuts, sesame seeds or any peanut products be brought to school. This would include peanut butter, peanuts and peanut oil. If your child has eaten peanut butter prior to coming to school please wash off their hands and rinse their mouth before coming to school. The reaction to peanuts is so severe that even a speck on a door handle or desk will put the allergic child at risk.

We would suggest that if your children would like to bring snacks to school, it should be something healthy and nutritious such as apples, oranges, carrot sticks etc. PLEASE DO NOT SEND candy or chocolate bars of any kind as these often contain peanuts, peanut oil or sesame seeds. Some other things to avoid are Peanut Butter Cups, plain M & M's, Glossette Peanuts, Glossette Raisins, Granola Bars, some brands of red valentine candy hearts, some types of cereal and some types of chocolate bars.

Please keep in mind that the children at risk would only have to touch (not eat) a tiny piece of the above and they could have a life threatening reaction.

Thank you very much for helping us to care for and make Robert Rundle a safer place for all our students! We know you will be very conscientious regarding the specifics of this request.
